

MGIC - Cover Letter

Dear Hiring Team,

I am writing to express my enthusiastic interest in this leadership opportunity. My background leading enterprise AWS modernization, platform engineering, and cloud infrastructure transformation directly aligns with your strategic priorities around Platform Engineering.

In my recent executive leadership roles, I built and scaled Terraform-driven self-service developer platforms, architected enterprise-wide security integrations with HashiCorp Vault, modernized multi-region database fleets to AWS Aurora, and partnered directly with executive FinOps leaders to drive measurable cloud cost efficiency.

I welcome the opportunity to discuss how my combination of technical architecture depth, organizational leadership, and business-focused execution can accelerate your engineering vision.

Sincerely,

Ran Eliahu
